SUMMARY

Full-stack engineer (React/Next.js, TypeScript, Python) with Dell R&D experience building automation and LLM-assisted tooling, and current consulting delivering ERPNext implementations plus an AI tutoring product. Strong in RBAC/security and self-hosted DevOps (Docker, Ubuntu, Cloudflare Zero Trust).

CORE SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, Redux • Backend: Node.js/Express, GraphQL, Django REST, ASP.NET Core, Python • Data/Infra: PostgreSQL, MongoDB, MySQL, Quickbase; Docker, Ubuntu, Cloudflare, Nginx, GitHub Actions • Platforms/AI: ERPNext (Frappe), Retool, n8n; TensorFlow/Keras, Pandas, LLM integration

EXPERIENCE

Freelance Full-Stack Developer — Independent Consultant May 2025 – Present

- Deliver parallel client engagements end-to-end (discovery to deployment), translating stakeholder needs into scoped roadmaps and shipped releases.
- Secure self-hosted deployments on Ubuntu using Docker Compose + Cloudflare Tunnels/Zero Trust (no open ports), backups, and wleast-privilege RBAC.

Client: Local MSME (Indore) - ERPNext migration & GST workflows - Link *May 2025 – Sep 2025*

- Migrated Tally data to ERPNext; configured accounting, invoicing, and GST-aligned reporting/workflows for day-to-day operations.
- Built Frappe/Python automations (order-to-invoice, reminders, dashboards) and operated the stack (DNS, tunnels, monitoring, backups). Link

Client: EdTech startup - AI tutor web app (Sole Frontend Engineer) - Link *Jul 2025 – Present*

- Built a Next.js/React frontend with reusable components, typed API integration, and resilient state management for quizzes and learning flows.
- Integrated AI features: quiz generation, adaptive level updates, and handwritten answer upload UX for step-by-step evaluation feedback.

Client: Digital marketing firm - ERPNext project management system - Link *Oct 2025 – Present*

- Modeled projects/campaign deliverables and approvals on ERPNext; delivered a custom app and UI refinements to match internal processes.
- Designed RBAC + workflow guardrails; deployed and maintained on self-hosted infrastructure (Cloudflare, firewall hardening).

Associate Tech Lead (Contract) - Future Money (FinTech) Mar 2025 – May 2025

- Built TypeScript/GraphQL services and schema-first APIs for core workflows, emphasizing strong typing and clear integration contracts.
- Extended Retool admin tooling over PostgreSQL to streamline operations and reduce manual back-office effort.

Software Engineer — Dell Technologies R&D Aug 2021 – Mar 2025

- Design Map DB (Quickbase + Python): migrated Excel to secure RBAC/DLP database, reducing errors by 60% and processing time by 80%.
- Stackup Search Console (React + Django REST + Falcon-7B): LLM-assisted Excel parsing/search, improving design turnaround by ~40%.
- Stripline Solver (Python + TensorFlow): deep-learning EM solver 10× faster, reducing simulation time by ~60%; ISG Hackathon 2021 (Regional) Winner.

PERSONAL PROJECTS

Ubuntu Server Homelab & DevOps 2023 – 2025

- Containerized 20+ services; Cloudflare tunnels/Zero Trust with no open ports; improved remote HTTPS time-to-first-byte by ~35%.
- Media automation pipeline (Jellyfin, Sonarr/Radarr, Bazarr, ffsubsync) for zero manual subtitle fixes and stable 4K playback.

EDUCATION

B.E. (Hons.), Computer Science — BITS Pilani, Hyderabad Campus 2022
